PREFACE

Volume IX of the *Ur Excavations, Texts* series contains neo-Sumerian economic texts currently in the University Museum, Philadelphia which were not included in *UET III*. A proposed future volume will contain the unpublished Ur III period texts in the British Museum.

The texts are arranged by subject matter and chronologically within the various categories. The dating system for the Ibbi-suen period texts differs from that used by L. Legrain in *UET III* as is explained on P. 84.

The volume is the work of Dr. Darlene Loding, Research Associate, University Museum, Philadelphia.

Because of the fragmentary condition of the texts in this
volume, all line counts in the indices are based on lines
which include signs, or fragments of signs. Uninscribed
or completely destroyed lines are not counted. Those
items beginning with ² etc. are indexed alphabetically
according to the next remaining sign.

Ur numbers in left columns; Publication numbers in right columns.
The order of the months follows that used by L. Legrain in *UET III*, p. 278.

Year dates for Sulgi are based on a reign of 48 years.

The year dates for the reign of Ibbi-suen, of course, present a more difficult problem. Since much research on the order of year dates for Ibbi-suen has taken place since the publication of *UET III*, the system of year dates given there has not been used. Dates after IS 4 follow the system proposed by E. Sollberger in *AfO* 17, p. 43. It may be noted that text number 1370 definitely establishes the sequence as far as IS 6.

Following is the list of correspondences between the Legrain and Sollberger years found in *AfO* 17 with the Legrain year given first:

\[
\begin{align*}
5 + 6 & = 5; 7 + 8 = 6; 9 = 6 + 1; 10 = 6 + 2; 11 = 15; 12 = 16; 13 = 17; 14 = 20; 15 = 12; 16 = 12 + 1; 17 = 18; 18 = 18 + 1; 19 = 21; 20 = 14; 21 = 22; 22 = 23; 24 = 9
\end{align*}
