EDITORIAL NOTE.

THE Harvard Semitic Series will consist of occasional volumes in the field of Semitic exploration, philology, literature, history, and religion.

Volumes I and II, which are now in preparation, will give the results of the explorations carried on at Samaria in the years 1908—1910.

The present volume by Dr. Hussey comprises those cuneiform tablets belonging to the Harvard Semitic Museum which come from the reigns of the Sumerian rulers Lugalanda and Urukagina. While Sumerian is not a Semitic tongue, its relations to Babylonian and Assyrian are so intimate that the inclusion of a Sumerian volume in a Semitic series will be considered as a matter of course by workers in this field. The tablets here published were acquired by the Museum in the years 1903 and 1904, from two New York dealers.

The cost of the publication of this volume has been met by the generosity of the Hon. Jacob H. Schiff, founder and patron of the Semitic Museum.

The SUMERIAN TABLETS may be ordered from the *Harvard Publication Agent*, Cambridge, Mass., or from the *J. C. Hinrichs'sche Buchhandlung*, Leipzig, Germany.

The price is \$ 5.00 or 20 Marks, postage prepaid.

INTRODUCTION.

The tablets published in this volume are for the most part accounts of the palace and temple expenses for various months from the fifth year of Lugalanda to the seventh year of Urukagina.¹ The provenance of most of them is assured by the mention of Lagash in the date formula, or, where this is lacking, by their similarity to tablets known to have come from that place.

Of No. 1 probably only about one half of the obverse has been preserved, and the reverse is entirely broken away except the remains of the column lines discernible at the bottom. A line is drawn across the upper margin, thus separating the obverse from the reverse. This tablet contains a list of proper names, and is to be classed palaeographically with Nos. 9—15 of the first series of Thureau-Dangin's *Recueil de Tablettes Chaldéennes*. He has pointed out in his introduction that the frequent use in those tablets of the name of the god of Šuruppak as an element in proper names is an indication that they may have come from Šuruppak. For the same reason this tablet may also be supposed to have come from that place.

Nos. 2—4 are general statements of monthly expenses.

No. 41 is a list of offerings to the gods.

Nos. 42—52 are of heterogeneous character and have therefore been placed together.

The rest of the tablets belong to groups, or series, designated by the Sumerian scribes as follows:

še-ba lù-šuku(-ku) ba: Nos. 3—13.

dub igi-dub: No. 14.

še-ba igi-nu-dü šag-dub-ḥal: Nos. 15—16.

še-ba igi-nu-dü il šag-dub-ḥal: Nos. 17—18.

še-ba e-kid-a: No. 19.

še-ba gim-tur ^aBa-ú: No. 20—23.

še-ba gim-tur il igi-nu-dü šag-dub-ḥal: No. 24.

še-ba lù-tur-tur-la-ne: Nos. 25—27.

zid šu-ḥa ú-rum ^aBa-ú: No. 28.

še-ba šu-ḥa ab-ba: No. 29.

še-nig áš-nig sá-dú(g) itu-da: Nos. 30—36.

še kú-a gud udu: No. 37.

gan šuku ki-a: Nos. 38, 40.

INTRODUCTION.

Copies of the tablets correspond in size to the originals. Shading indicates some defacement of the tablet, either by an injury received while the clay was still soft or by a break that has occurred afterwards. An attempt has been made faithfully to reproduce the original text, but I am aware that, in cases in which the scribes allowed themselves considerable latitude in the number of minute parallel wedges in a given sign, I have not at all times reproduced the exact number. In no case, however, have I exceeded the limits of variation which the scribes allowed themselves, and rarely will the deviation from the original exceed one wedge: e. g. in the signs *lu* and *la* the number of perpendicular wedges on the tablet varies from three to seven or eight, while in the signs *da* and *šu* there are occasionally as many as nine horizontal wedges.

Characters.

The number of signs which occur here for the first time is not large.¹  (1 Ob. I¹),  (1 Ob. III¹),  (42 Ob. I¹),  (45 Ob. I²) occurs in Nik. Doc. 241 Ob. I¹. The first of these new signs (1 Ob. I¹) suggests Br. 949. Only a part of the third sign (42 Ob. I¹) is to be seen in the photographic reproduction (Plate 77), because the tablet crumbled somewhat after it was copied but before it was photographed. The form of the following signs is more archaic than any with which I am acquainted:

 (1 Ob. IV²) may be an older form of REC. 8, or it might be *ses-mu*.

 (1 Ob. VII¹) is a heightened form of *nam*. For the usual form see 1 Ob. VI².

 (1 Ob. VI³) is similar to REC. 24.

 (1 Ob. V²) may be compared with REC. 45 or REC. 464², but identification with either would be precarious.

 (1 Ob. III³, VI⁵, VII²) = REC. 114.

 (1 Ob. I⁴) = REC. 210.

 (1 Ob. VI³) = REC. 341.

 (1 Ob. V⁴), perhaps *dub + udu + udu*.

Numerical Notation.

Previous investigators have called attention to the fact that, although at this period numerals are usually written in curvilinear characters, they are occasionally written in cuneiform. In other words, numerals are commonly written with the circular end of the stylus, but sometimes with the square or trapezoidal end. They also agree that the numerical value of a character remains the same in whichever way it is written.

The following facts in regard to the use of the curvilinear and the cuneiform notations³ in these tablets have been noted.

¹ The numbering of the columns in this volume follows the order of the text rather than the consecutive order of the columns on the tablet, i. e., the numbering is from left to right on the obverse, from right to left on the reverse until the completion of the detailed portion and the summary, then the sum total which begins at the top of the left hand column of the reverse and continues toward the right, if one column is not sufficient.

² See also the last sign of Ob. line 1 in the E. A. HOFFMANN COLLECTION, No. 106, which is regarded by RADAU in his *Early Babylonian History* p. 428 as a variant of REC. 464. The same sign occurs on tablet 6 Obv. 7 of the Dréhem tablets in the Cleveland Public Library, which I expect to publish in the *Journal of the American Oriental Society*, vol. 33.

³ For discussions of this subject see DE LA FUYE in *Revue d'Assyriologie*, t. 7, pp. 41—47, and in *Journal Asiatique*, Sér. 10, t. 13 (1909), pp. 241—244; DE GENOULLAC in *TSA.*, pp. LXX—LXXI; NIKOLSKI in *Doc.*, pp. 12, 16, 18; THUREAU-DANGIN in REC. pp. 22, 88—90.

There are a number of tablets¹ in which all the numerals are written in the curvilinear system with the exception of a) The number of the year², or

b) The number of the year and the number of the payment of wages or the distribution³ of grain. These are always written in cuneiform.

Furthermore, the cuneiform is always used in writing the number of *qa*⁴, in giving the age of an animal⁵, or in stating that a second⁶ or third⁷ payment has been made. It is regularly employed in writing the number of asses, sheep, goats, oxen, or *dun* in accounts which give the allotment of food for domestic animals⁸.

The use of the double form of notation in the instances mentioned above may perhaps be sufficiently explained by the fact that the differentiation which the two systems afford greatly facilitates the reading. But that differentiation for the sake of greater ease in reading was not the only purpose served by the cuneiform notation is shown by a careful scrutiny of the methods of book-keeping employed. For the sake of clearness we will designate the totals that occur in the detailed portion of the account as detailed totals; the totals which give a classification of the detailed portion upon the basis of sex, wages, adult or minor age, as the summary⁹; and the totals giving the number of persons and quantity of grain as the sum total¹⁰.

The use of the cuneiform system in those monthly accounts¹¹ in which both forms of notation¹² are employed is as follows:

¹ Nos. 5, 6, 7, 17, 19, 20, 25, 27, 28, 29, 37, 38, 39, 40, 43, 44, 46, 47, 48, 49, 50, 51, 52.

² It is generally admitted that the horizontal wedge crossed by one or more oblique wedges at the end of the tablet indicates the year of the reign of the patesi or king. See *Journal Asiatique*, Sér. 10, t. 6 (1905), p. 552; *Revue d'Assyriologie*, t. 6, p. 107; Hilprecht Anniversary Volume, p. 122, note 3; Nik. Doc., p. 6; KING, *A History of Sumer and Akkad*, p. 169.

³ Written *ba-an* and *nig-an* respectively. The suggestion of NIKOLSKI, Doc., p. 12, that they correspond to the months can scarcely be verified in the form in which he makes it.

DE LA FUVE has demonstrated that the *gur sag-gal* contained 144 *qa* (see *Revue d'Assyriologie*, t. 7, pp. 36—40, and *Journal Asiatique*, 10^e Sér., t. 13, pp. 238—241). To the examples which he enumerates may be added Nos. 30, 35, and 36 of our texts. For the number of *qa* written in the curvilinear notation see Nik. Doc. 261, discussed by DE LA FUVE in *Revue d'Assyriologie*, t. 7, p. 39.

⁸ See Nos. 30—36.

⁹ The column giving the summary begins with *šu-nigin* and follows the detailed portion after an intervening space, if possible.

¹⁰ *gū-an-šu* is hardly to be translated with DE GENOULLAC (TSA., 11 Rev. VI¹ p. 33, sq.) "En tout, (par) le dieu Su!". *šu* = *ana* (Br. 7072); *gū* = *napharu* (Br. 3220 and MEISSNER *Seltene Assyrische Ideogramme*, 2033); *an* is perhaps to be compared with its use in the following cases; *a-dun-an*, 21 Rev. V¹⁵ | [dim-g]az-an, 22 Rev. III⁶ | *du-a-tar-an*, 26 Rev. I¹⁴ | *lul-an*, 25 Ob. VII⁴, 26 Rev. II³ | *nita-an*, 17 Rev. I¹, 18 Ob. VII¹¹ | *sal-an*, 17 Rev. I³, 18 Rev. II⁹, 25 Ob. VI², 26 Rev. II¹⁵, 27 Rev. II², III² | *šu-i-an*, 25 Ob. III¹⁶ | *šu-i sal-an*, 25 Rev. I¹¹, 26 Rev. III⁸ | *ú-bil-an*, 22 Rev. II⁶, or perhaps even with *kam-ma-an*, 40 Rev. III⁶ IV⁷, or *ba-an* and *nig-an* preceded by the numerals from one to twelve to indicate the number of the payment. The latter is found at the end of most of the monthly accounts.

¹¹ Namely, Nos. 8, 9, 10, 11, 12, 13, 15, 16, 18, 21, 22, 23, 24, 26, 30—36.

¹² In the following verifications the correctness of the numbers that have been supplied is assured either by the detailed total or by comparison with a similar account. Arabic numerals have been used for the transliteration of the curvilinear, and Arabic numerals followed by a obelus for the cuneiform.

INTRODUCTION.

1) When both forms are employed in the detailed portion, in the summary, and in the sum total, the numbers in the summary and in the sum total are the sums of those numbers written respectively in each form of notation in the detailed portion of the account.

2) When the cuneiform is used in the detailed portion and in the summary but not in the sum total, the cuneiform of the summary corresponds to the cuneiform of the detailed portion, and the sum total, which is written in curvilinear, is the sum of those numbers written in curvilinear alone, the cuneiform being entirely omitted, as in Nos. 8 and 16.

The curvilinear and cuneiform are added together in the detailed total in No. 11 Ob. IV¹⁴, but the cuneiform is omitted from the final sum total.

3) Both forms of notation may be used in the detailed portion, in the summary, and in the sum total which gives the number of persons, but the cuneiform may be omitted in the sum total which gives the quantity of grain, in which case the grain total is the sum of the numbers written in curvilinear alone, as is illustrated by the following table.

In making this calculation the cuneiform in Rev. III⁴, i. e. $7\frac{2}{4}\frac{2}{24}$ gur, has been omitted.

Since Nos. 35 and 36 are entirely similar, the one may be used to supplement the other. Without giving a complete verification, it is to be noted that the following numbers written in cuneiform have been omitted from the total:

4) When both forms are used in the detailed portion, the cuneiform may be omitted from both the summary and the sum total. In this case the totals are the sum of the numbers written in the curvilinear characters in the detailed portion, those written in cuneiform not being counted at all.

5) Unmistakable signs of erasure show that numbers originally written in cuneiform have been erased and replaced by numbers written in curvilinear.

Erasure of the cuneiform and substitution of the curvilinear are found in No. 11 Ob. I¹¹, III^{10, 11, 13, 14, 16, 17}, IV^{3, 11, 15}, V^{2, 3, 5, 6, 8}, VI^{1, 2, 3, 6, 7}, VII^{6, 9}, Rev. I^{2, 6}, II¹⁷.

No. 34 Ob. II⁷, III^{3, 4, 12, 13}, IV^{1, 6, 7, 8, 9, 10, 11, 12}, V⁹, VI^{4, 7}, Rev. I^{10, 13}, III^{9, 11, 13, 15}, IV³.

For the verification of No. 34 see page 5.

6) In the fourteen pay rolls just considered wages are written in cuneiform 72 times, and in curvilinear 2985 times, i. e., the proportion of the cuneiform to the curvilinear in these tablets is about 1:40.¹

¹ The uses of the cuneiform and curvilinear notations may be tabulated thus:

	Detailed Portion	Detailed Total	Summary	Sum Total
1	cuneiform and curvilinear differentiated			
2	"	"	"	cuneiform omitted (note exception)
3	"	"	"	cuneiform and curvilinear differentiated in the sum total of persons, but omitted from the grain total
4	"	cuneiform may be omitted	cuneiform omitted	cuneiform omitted

INTRODUCTION.

These facts may be briefly summarised as follows. In accounts in which both notations are used in the detailed portion, the cuneiform could either be noted separately or entirely omitted from the detailed total, from the summary, or from the sum total, or any combination of omission and retention of the cuneiform seems to have been allowable. Its use was restricted, and it was therefore reserved for exceptional cases. In monthly accounts of expense the totals may be expected to represent the amount of disbursement, and amounts that are either not included in the total, or, if included, differentiated from the main total, may very well represent the amounts which for one reason or another were not paid out¹.

The suggestion that wages which were due but unpaid were written in cuneiform and that wages actually paid were written in curvilinear characters may receive some further support from the following consideration. In the tablets published in this volume it is stated some thirty times (see p. 3) that a payment is made twice, and once a payment is made three times. If some monthly accounts show by the writing of the wage in cuneiform that persons have not been paid at all, and others show that the same persons have been paid twice, is it not possible that the latter is a payment of arrears? At present it is impossible to give adequate proof that this is the case. For this it would be necessary to have accounts for consecutive months of successive years. The following table illustrates what is actually found. In Nos. 1 and 3 the double payment precedes the wages written in cuneiform, and in No. 2 the double payment follows the cuneiform, but is separated from it by so long an interval that no necessary connection between the two can be established until the publication of other accounts fills in these intervals.

Clerical Errors.

The accurate and analytic method with which accounts were kept is astonishing. Nevertheless, errors do occur occasionally and may be listed as follows:

- 1) *nu-nu-[d]ă* for *igi-nu-dă*, 17 Ob. II¹³.
- 2) *É-ta-dă-ta* for *É-ta-ě*, 17 Rev. IV¹.

¹ It would be futile to enter into a discussion of the possible causes of lack of payment, for they were probably manifold. The death of a number of persons with whose names we have grown familiar (such as *Lugal-da-nu-me-a*, *Lugal-dingir-mu*, *A-bad-mu*, *Lugal-nanga-ra-ná*, *E-nam*, *Ud-ni-kus*, etc.) is recorded in DP. 138, Nik. Doc. 7, and 14. But cases in which wages of the same person are written in cuneiform in one year and at a later period in curvilinear show that lack of payment must sometimes be attributed to other causes than death, e. g.,

² Payments are frequently made in advance in the Orient today.

- 3) *A-na* for *Za-na*, 21 Ob. V¹¹.
 4) ^d*Mu-mu*¹ for ^d*Šeš-mu*, 37 Rev. I².
 5) *Nin-da-nu-me-me* for *Nin-da-nu-me-a*, 22 Ob. IX⁶.
 6) In No. 11 the detailed total in Ob. VI¹⁵, viz., $2\frac{1}{4} \frac{2}{24}$, is a mistake for $2\frac{2}{4}$. In line 14 both numerals are partly broken away, i. e. the number of men and their rate of wage, [] $\frac{2}{24}$. The latter is determined by consulting the summary (Rev. V), which calls for men at three different rates of wage, namely $\frac{2}{4}$, $\frac{1}{4} \frac{2}{24}$, and $\frac{1}{4}$. The rate of wage in line 14 must be therefore $\frac{1}{4} \frac{2}{24}$.

The number of men enumerated in the summary who receive this wage is seven. Ob. V⁶ mentions one man at this wage, therefore the numeral in line 14 must have been six, since this rate is given in no other line on the tablet.

$$\begin{array}{l} \text{line 13)} \quad I \times \frac{2}{4} = \frac{2}{4} \\ \text{line 14)} \quad 6 \times \left[\frac{\frac{x}{4}}{4} \right] + \frac{2}{24} = \frac{6}{4} \frac{\frac{12}{24}}{4} \\ \hline \frac{8}{4} \frac{\frac{12}{24}}{24} = 2 \frac{2}{4} \end{array}$$

The sum total of $117\frac{2}{24}$ is obtained by adding together the various detailed totals, if this correction is made.

- 7) In No. 12 Ob. V² the scribe has written 2 *gur* instead of 1, i. e., the barley for 4 men at $\frac{1}{4}$ *gur*. This is simply an error in writing down the detailed total, since a verification of the whole account shows the summary and the sum total to be correct.

- 8) In No. 19 two scribal errors occur: a) in Ob. II³ where instead of $3\frac{2}{4}$ *gur* there should be only 3 *gur*², and b) in Ob. V² there should be $1\frac{4}{24}$ instead³ of $1\frac{2}{24}$. A verification of the summary and sum total⁴ show that these are scribal errors and not errors of calculation.

- 9) In No. 21 the detailed total in Ob. VI⁶⁻¹⁰ enumerates 1 ša(g)-du(g)-nita and 2 ša(g)-du(g)-sal, whereas in the portion of which this is the detailed total (Ob. V⁵-VI⁴) no dumu nita is mentioned. A comparison of Ob. V⁵-VI⁴ with DP. 112 Ob. IV¹⁸-V¹⁶ shows the error.

¹ See No. 37 Ob. II⁸, III⁶, IV³, V⁹, Rev II⁴.

$$2 \quad 8 \times \left(\frac{1}{4} + \frac{2}{24} \right) = \frac{8}{4} + \frac{16}{24}$$

$$1 \times \left(\frac{1}{4} + \frac{2}{24} \right) = \frac{1}{4} + \frac{2}{24}$$

$$\frac{9}{4} + \frac{18}{24} = 3$$

INTRODUCTION.

to be in No. 21 Ob. V¹⁹, where *dumu-sal* has been written instead of *dumu-nita*. To obtain¹ a sum total of 33 *ša(g)-du(g)-nita* (Rev. VII⁵) line 19 must be counted in accordance with the above correction.

10) In No. 22 there seem to be three mistakes: a) in Ob. VI¹³ $\frac{3}{24}$ is an error for $\frac{4}{24}$ if the detailed total in VI¹⁸ is correct; b) Ob. VI¹⁶ calls for *dumu-sal* in the detailed total of VI¹⁹ instead of *dumu-nita*; c) in Rev. I¹¹ we should expect 7 *ša(g)-du(g)-sal* instead of 4 (cf. Ob. VIII^{10, 13}, IX¹⁵, Rev. I^{2, 5}). However, 6 seems to have been the number actually employed in the calculation of the detailed total in Rev. I¹² (!).

11) In the summary of No. 24 Rev. IV² the scribe wrote 81 instead of 93 men at $\frac{1}{4}$ *gur*. That this is merely a scribal error and not one of calculation is shown by counting the number of men who received $\frac{1}{4}$ *gur*², and by the fact that 93 must have been the number actually employed in making up the sum total of persons and of barley in Rev. VI¹⁻².

¹ On account of the broken state of the text we call attention to the following readings in No. 21:

Rev. VII⁹ is to be read (5×10) LAL 3,

Rev. VIII¹ = (3×60) + (5×10) LAL 3,

Rev. VIII² = (3×10) LAL (1 + $\frac{2}{4} + \frac{1}{24}$).

12) In No. 29 Ob. I³ $3\frac{1}{4}$ is written in the detailed total instead of $3\frac{2}{4}$. The sum total of II¹
II¹₄ *gur* in Rev. II² is correct.

13)¹ In No. 34 Rev. I¹⁵ a total of 10 *gur* as the monthly feeding at the rate of $\frac{1}{4} + \frac{4}{24} gur$ per ox, requires 24 oxen instead of 26 of l. 12. That 26 is a scribal error for 24 is shown a) by a comparison with No. 35 Rev. I⁶⁻⁹ and No. 36 Rev. I¹³⁻¹⁶, b) by the fact that the sum total (Rev. V¹) requires 24 in line 12.

Inventaire des Tablettes de Tello Tome I (1910) by FR. THUREAU-DANGIN, Tome II, Part I (1910), Part II (1911) by H. DE GENOULLAC did not come into my hands until after the manuscript of the present volume had gone to the printer (September, 1911).

It is now a great pleasure to acknowledge my obligations to those who have made this publication possible. In the first place to the Baltimore Association for the Promotion of the University Education of Women, whose fellowship I held in the year 1909—1910, and to the Association of Collegiate Alumnae, which granted me the Alice Freeman Palmer Memorial Research Fellowship for the year 1910—1911. During the year 1909—1910 I worked chiefly upon tablets from the Dynasty of Ur, the publication of which I hope may not be long delayed, and during 1910—1911 upon those composing this volume. The latter being older, it seemed proper that they should be published first. To Professor David Gordon Lyon, curator of the Harvard Semitic Museum, I am under no less obligations for allowing me to study and copy the tablets and for many other courtesies.

¹ In the detailed total Rev. I⁹ of No. 33 the numeral has been omitted. But since it was not counted in making up the sum total, its omission was probably intentional, in which case it could not be considered an error. (For the omission of numerals written in cuneiform see pp. 5—7.) The errors made in the detailed totals in accounts in which the final totals are correct, or the omission of detailed totals where they might be expected, show that the sum total was not made up from the addition of the detailed totals.

INDEX OF NAMES OF PERSONS.

It has not been possible to make a detailed study of Sumerian proper names. The index has been prepared for the convenience of those who may use this volume, but it does not purport to indicate the meaning of the names nor to give their correct pronunciation. In general the same system of transcription has been employed as in Thureau-Dangin's *Inscriptions de Sumer et d'Akkad*.

Feminine names are preceded by the sign of Venus. Under all proper names the occupational names are arranged alphabetically and numbered. The word "over" signifies that the person in question is an overseer or foreman; the word "under" means that he is a laborer under the foreman whose name and occupation immediately follow, if they are mentioned on the tablet.

The first numeral in each reference indicates the number of the tablet in this volume, the Roman and superior numerals indicate the column and line respectively. An asterisk before a reference indicates that some part of the line is broken. Names that have been supplied are enclosed in brackets.

Abbreviations: b. = brother; ^d = determinative with the name of deity; d. = daughter, dd. = daughters; f. = father; L. = Lugaland; m. = mother; Ob. = Obverse; prob. = probably; REC. = Thureau-Dangin, *Recherches sur l'origine de l'écriture cunéiforme*; Rev. = Reverse; s. = son, ss. = sons; U. = Urukagina; var. = variant; w. = wife.
